

Jacques REISSE, Emeritus Professor of the Free University of Brussels, Member of the Belgian Royal Academy of Sciences.

Honorary Degree of the University J. Fourier of Grenoble (France), Fellow of the Acoustical Society of America, Honorary Member of the European Sonochemical Society, Member of the Scientific and Strategic Council of the Collège de France (Paris).

Former-president of various scientific councils of CNRS laboratories in France. Former-president of the Scientific

Council of the « Pole Scientifique et Technique de Grenoble » (France).

Former member of the editorial board of the Journal of Physical Organic Chemistry and of the European Journal of Organic Chemistry.

Former member of the Scientific Board of the International Society of Magnetic Resonance, former member of the Scientific Board of the European Conference in Experimental Nuclear Magnetic Resonance (EENC).

Visiting professor and visiting scientist in France, Switzerland, Germany, United Kingdom, Romania, USA.

More than 130 conferences in universities, research centres or as plenary lectures.

Around 150 papers and various chapters of books devoted to stereochemistry, nuclear magnetic resonance, structure of the liquid state, sonochemistry, organic cosmochemistry and chemical evolution.

Co-editor of two books devoted to exobiology.

Author of “La longue histoire de la matière: une complexité croissante depuis des milliards d’années” Presses Universitaires de France (Paris, 2006).
